Hangar 9[®] Alpha READY-TO-FLY RC TRAINER

A successful first flight doesn't start until the engine does. Yet many ready-to-fly trainers that claim to be

for beginners come equipped with engines that demand a level of experience most beginners don't have. This is the magic of the Alpha's extraordinary Trainer Power System from Evolution Engines[™]. Every Evolution system's engine is test run and tuned at the factory so you can easily get the Alpha flying, right out of the box.

No break-in period. No tedious trial and error with the carburetor settings. Just fuel it up, and with a few flips of the prop, you're flying.

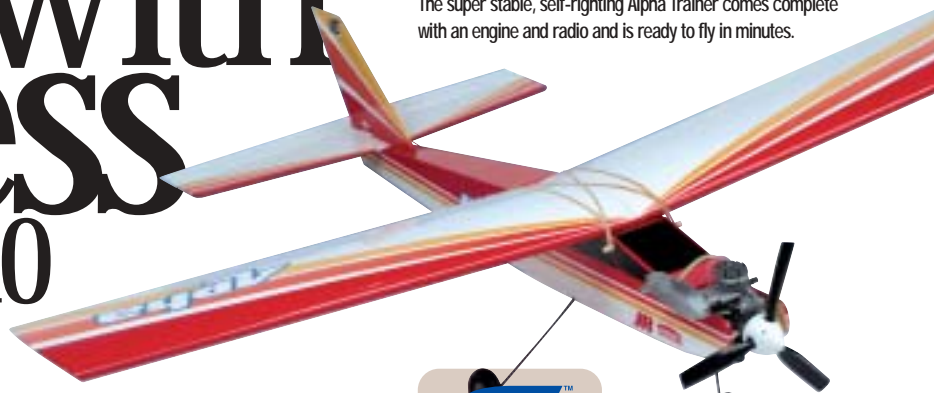

ALPHA RTF SPECIFICATIONS

Hangar 9 Alpha Trainer RTF
HAN2475 Street Price \$309.99

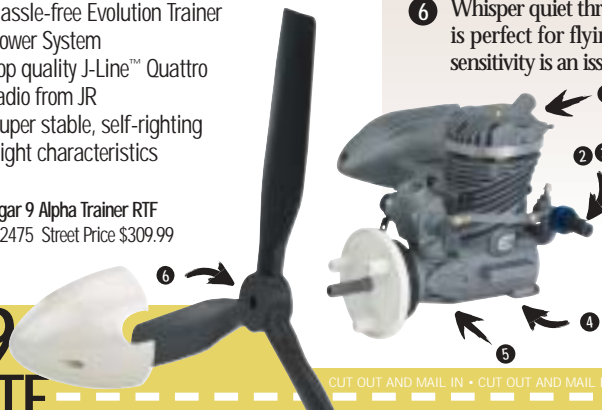

The super stable, self-righting Alpha Trainer comes complete with an engine and radio and is ready to fly in minutes.

*The Evolution Trainer
Power System Up Close*

- 1 Canted glow plug tilts glow driver away from propeller during starts for safer operation
- 2 Needle valve limiters guarantee easy starting and great performance
- 3 Rear needle valve provides safe, easy adjustments
- 4 Dual ball bearing supported crankshaft extends engine life and improves reliability
- 5 Flywheel system for easy starting and smooth idle
- 6 Whisper quiet three-bladed training prop is perfect for flying fields (where noise sensitivity is an issue) and provides spirited performance without excessive airspeed

Evolution Trainer Power System also available separately
EVOE100 Street Price \$79.99
